

# AgenPro 3 hangs on startup with NullPointerException on Console

If AgenPro does not start and prints the following stack trace on the console, some incompatibility of the used Look&Feel with the JDK's system color defaults could be the reason.

```
Exception in thread "main" java.lang.NullPointerException
  at javax.swing.plaf.ColorUIResource.<init>(Unknown Source)
  at com.klg.jclass.table.JTableUI.installDefaults(Unknown Source)
  at com.klg.jclass.table.JTableUI.installUI(Unknown Source)
  at javax.swing.JComponent.setUI(Unknown Source)
  at com.klg.jclass.table.JTable.setUI(Unknown Source)
  at com.klg.jclass.table.JTable.<init>(Unknown Source)
  at com.agentpp.common.table.PopupTable.<init>(Unknown Source)
  at com.agentpp.common.table.ExtendedTable.<init>(Unknown Source)
  at com.agentpp.agenpro.AgenProFrame$1.<init>(Unknown Source)
  at com.agentpp.agenpro.AgenProFrame.<init>(Unknown Source)
  at com.agentpp.agenpro.AgenPro.<init>(Unknown Source)
  at com.agentpp.agenpro.AgenPro.main(Unknown Source)
```

To get AgenPro to run again, edit the **AgenPro3.cf** file and remove the line that starts with

```
LookAndFeel=
```

or define it as:

```
LookAndFeel=com.jgoodies.looks.plastic.Plastic3DLookAndFeel
```
