

How to get autoconf installed/upgraded?

SNMP++, AGENT++, and AgentX++ require autoconf version 2.64 or higher. Version 2.69 is recommended. If your system does not provide version 2.69 out of the box, you can install it using the following steps.

Install autoconf 2.69

```
wget http://ftp.gnu.org/gnu/autoconf/autoconf-2.69.tar.gz
tar xvfz autoconf-2.69.tar.gz
cd autoconf-2.69
./configure
make
sudo make install
```

Autoconf for Mac OS X

Install Autoconf Tools for SNMP+/AGENT+ on Mac OS X

```
curl -O -L http://ftpmirror.gnu.org/autoconf/autoconf-2.69.tar.gz
tar xvf autoconf-2.69.tar.gz
cd autoconf-2.69
./configure
make
sudo make install
autoconf --version
cd ..
curl -O -L http://ftpmirror.gnu.org/automake/automake-1.15.tar.gz
tar -xzf automake-1.15.tar.gz
cd automake-1.15
./configure
make
sudo make install
cd ..
curl -OL http://ftpmirror.gnu.org/libtool/libtool
cd libtool-2.4.6.tar.gz
tar -xzf libtool-2.4.6.tar.gz
cd libtool-2.4.6
./configure
make
sudo make install
cd ..
tar -xzf pkg-config-0.29.2.tar
cd pkg-config-0.29.2
./configure
make
./configure --prefix=/usr/local CC=$CC --with-internal-glib
make
sudo make install
```
