How can I download older versions of SNMP4J (-Agent) not listed on snmp4j.org?

First, please check if the release you are looking for is stored in the Maven repository available at:

https://oosnmp.net/dist

If it is an older release and you did not find it within the link above, then you might be able to get it using the following pattern:

Generally all SNMP4J versions can be downloaded by using the following URL pattern:

```
http://www.snmp4j.org/snmp4j-<version>.zip
```

<version> is the version of the product which can be copied from the CHANGE LOG, for example **1.9.3d**.

For SNMP4J-Agent the URL pattern is:

```
http://www.snmp4j.org/snmp4j-agent-<version>.zip
```
